## PROJECTS

### Portfolio Website

Built by experimenting with AI-assisted development in the Cursor IDE to understand frontend workflows and modern coding patterns.

- Used the Cursor IDE to generate and refine HTML, CSS, and basic JavaScript for the site
- Adjusted layouts and styles to achieve a clean, responsive design
- Learned how to review, modify, and improve AI-generated code instead of blindly copying

### Edusphre

A web-based platform created as a student project to simplify access to academic resources.

- Developed backend functionality using Java
- Learned and implemented basic API connections for data flow
- Integrated backend logic with the frontend structure built by the team
- Improved understanding of server-side workflows and request-response handling
